

### Echo Valley Drive - Road Closure for Street Maintenance

Des Moines Public Works has scheduled a slurry seal of Echo Valley Drive from the middle of the intersection of old Hwy 28 east to near the main entrance of Echo Valley Country Club. The prep work, including patching and clean up, will take place prior to the slurry seal. The slurry seal is a preventative maintenance procedure used to seal surface cracks, slow down raveling and improve skid resistance of structurally sound streets. The slurry seal is **NOT** a resurfacing project. The initial rough texture of the slurry seal is normal and will smooth with time and traffic.

Weather permitting, the slurry seal will be placed at approximately 8 a.m. on Thursday, July 11, 2013. The street will be **closed** to **ALL** traffic during the placement of the slurry seal. This may affect access to your property and arrangements should be made for alternate access during the placement. Echo Valley Drive residents will need to enter and exit from the east on Thursday. This street will be **CLOSED OVERNIGHT** and reopened in the morning the following day.

If you have any questions or concerns, please contact Tim Hoskins, Norwalk Public Works Director, at 981-0228.
